COURSE AIM

Every business day, banks, brokerage houses, and other institutions transfer millions of dollars around the globe at the speed of light. Yet the financial services industry has just begun to harness the power of the worldwide network known as the Internet. Banking and Finance on the Internet offers bankers, mutual fund managers, and other financial services decision-makers insight on crafting effective online commerce strategies of their own. With topics by authorities from the worlds of electronic commerce and academia, Banking and Finance on the Internet addresses the most pressing online financial services topics.

COURSE OBJECTIVES

This course teaches students how financial processes are conducted using computer networks. The course builds on basic concepts of finance and e-business to provide and integrated view of electronic financial services.
