## COURSE AIM

The goal of this course is to introduce students to macro economics concepts and macroeconomic models for analyzing data, as well as the role of the government and its policies with reference to the real world experience.

## COURSE OBJECTIVES

The real focus of macroeconomics is the study of unemployment, business cycles (fluctuations in the economy), growth and inflation. While the macroeconomic theories studies have changed considerably over the past 60 years, macroeconomics focus on those problems has remained. Thus, we'll define macroeconomics as the study of the economy in the aggregate with specific focus on unemployment, inflation, business cycles and growth.

## STAFF REQUIREMENTS

|                          | Qualifications                          | Special Skills | Number |
